# CONTENTS VOLUME 23, 1985

*Research Papers*

Investigation of *Artemisia tridentata* as a biogeochemical uranium indicator
F.E. Diebold and S. McGrath (Butte, Mont., U.S.A.) . . . . . 1

Trace-element behavior in the W-Sn granite of Regoufe, Portugal
S.P. Vriend, M.G. Oosterom, R.W. Bussink and J.B.H. Jansen (Utrecht, The Netherlands). . . . . 13

The method of partial extraction of metals in a constant current electrical field for geochemical exploration
B.M. Shmakin (New York, N.Y., U.S.A.) . . . . . 27

The use of fluorine as a pathfinder for volcanic-hosted massive sulfide ore deposits
N.G. Lavery (Houston, Texas, U.S.A.). . . . . 35

Application of mercury survey technique over the mausoleum of Emperor Qin Shi Huang
Chang Yong and Li Tong (Hebei, P.R. of China) . . . . . 61

Hydrogeochemical exploration for Mississippi Valley-type deposits, Arkansas, U.S.A.
K.F. Steele (Fayetteville, Ark., U.S.A.) and T.F. Dilday, III (Houston, Texas, U.S.A.) . . . . . 71

Indication of methane movement from petroleum reservoir to surface, Löningen oil-field, NW-Germany
M. Goth (Tübingen, F.R. Germany) . . . . . 81

Announcement . . . . . 99

Erratum. . . . . 100

*Research Papers*

The relationship of soil $^{210}$Po and $^{210}$Pb geochemical dispersion patterns to uranium mineralization
J.W. Card and K. Bell (Ottawa, Ont., Canada). . . . . 101

The copper-nickel concentration log: a tool for stratigraphic interpretation within the ultramafic and basal zones of the Stillwater Complex, Montana
L.J. Drew and W.J. Bawiec (Reston, Va., U.S.A.), N.J. Page (Menlo Park, Clif., U.S.A.) and J.H. Schuenemeyer (Newark, Del., U.S.A.) . . . . . 117

Correlations among hydrocarbon microseepage, soil chemistry, and uptake of micro-nutrients by plants, Bell Creek oil field, Montana
S.S. Roeming and T.J. Donovan (Flagstaff, Ariz., U.S.A.) . . . . . 139

Lithogeochemistry in exploration for Proterozoic porphyry-type molybdenum and copper deposits, southern Finland
P.A. Nurmi (Helsinki, Finland). . . . . 163

Adsorption of platinum, gold and silver by filter paper and borosilicate glass and its relevance to biogeochemical studies
Y. Samiullah (London, U.K.). . . . . 193

*Rumex acetosella* L. and *Minuartia verna* (L.) Hiern as geobotanical and biogeochemical indicators for ore deposits in northern Greece
A.E. Kelepertsis (Athens, Greece), I. Andrulakis (Salonica, Greece) and R.D. Reeves (Palmerston North, New Zealand) . . . . . 203

Comparison of interpretations of geochemical soil data by some multivariate statistical methods, Key Anacon, N.B., Canada
C.Y. Chork and G.J.S. Govett (Kensington, N.S.W., Australia). . . . . 213

A procedure for estimating *Bacillus cereus* spores in soil and stream-sediment samples — a potential exploration technique
J.R. Watterson (Denver, Colo., U.S.A.) . . . . . 243

Use of seaweed and slope sediments in fjord prospecting for lead-zinc deposits near Maarmorilik, West Greenland
H.J. Bollingberg and H.R. Cooke, Jr. (Copenhagen, Denmark) . . . . . 253
Numerical modelling experiments in vapour geochemistry. II: Vapour dispersion patterns and exploration implications
Tianjin Ruan (Wuhan, China), M. Hale and R.J. Howarth (London, U.K.) . . . . . 265
Fuzzy cluster analysis in geochemical exploration
Yu Bochang and Xie Xuejing (Hebei, P.R. of China). . . . . 281
The automated photometric determination of total fluorine in mineral exploration
R. Fuge and M.J. Andrews (Aberystwyth, U.K.) . . . . . 293
Selective extraction of organically bound gold in soils, lake sediments and stream sediments
D.C. Grégoire (Ottawa, Ont., Canada) . . . . . 299
Mineralogical investigations in the interpretation of heavy-mineral geochemical results from till
V. Peuraniemi (Oulu, Finland) and K. Heinänen (Raahensalo, Finland) . . . . . 315
